

Superior Pathogen Detection

A New Solution to the 'No Growth' Conundrum
Detect **All** Bacteria and Fungi with **DNA Sequencing**

The diagnosis of chronic and atypical infections is challenging. Conditions like otitis, chronic wounds, UTIs, pyoderma, or respiratory diseases involve many pathogens that are extremely difficult to culture. Biofilms are even unculturable.

The **MiDOG** All-in-One Test
Offers the Detection of All Pathogens:

All Aerobic &
Anaerobic
Bacterial
Pathogens

All Fungal
Pathogens

Antibiotic
Resistance
Screening to 43
Antibiotics

Results in just 48 hours for proactive patients treatment

Detect & Quantify Pathogenic Species Including:

- ✓ *Ureaplasma sp.*
- ✓ *Mycoplasma sp.*
- ✓ *Mycobacterium sp.*
- ✓ *Nocardia sp.*
- ✓ *Pseudomonas sp.*
- ✓ *Enterobacter sp.*
- ✓ *Proteus sp.*
- ✓ *Bacillus sp.*
- ✓ *Klebsiella sp.*
- ✓ *Acinetobacter sp.*
- ✓ *Micrococcus sp.*
- ✓ *Alcaligenes sp.*
- ✓ *Chlamydomphila felis*
- ✓ *Yeast Malassezia sp.*
- ✓ *Coagulase-negative Staphylococci sp. & Streptococci sp.*
- ✓ *Corynebacterium sp.*
- ✓ *Enterococcus sp.*
- ✓ *Finegoldia magna*
- ✓ *Bordetella bronchiseptica*

and many more!

Applicable for **ANY** animal species and **ANY** sample type
